FOOD PURCHASING PRACTICES DURING THE COVID-19 PANDEMIC

Based on fall 2020 survey of 5,000 representative households

Food Expenditures by Channel
Sept 2020

- Large format grocery (55.17%): Includes supercenters and supermarkets.
- Niche, independent & specialty stores (14.33%): Include butchers, bakeries and ethnically-specific grocers.
- Limited selection (12.49%): Includes assortment grocers or discount stores.
- Boxes & meal kits (3.13%): Include CSA boxes, emergency food boxes, and at-home meal cooking kits.
- Direct & farmers markets (3.14%): Include farmers markets and farm stands.
- Limited selection (11.73%):

35% of respondents tried at least one new channel for purchasing food.

30% to 40% of respondents continued to shop local market channels into September 2020 (after restrictions had eased).

Metro areas accounted for the biggest spending increases at specialty stores, meal kits, and direct from producers.

Large format grocery stores still account for over 50% of weekly food spending.

Spending at niche, independent & specialty food stores now captures 10% of spending.
